

# enger

There is no other interior design element that we have such a close relationship with as door handles. We touch them countless times each and every day. Therefore, I believe that choosing that one, perfect model should not be left up to chance.

The catalogue you are holding was created to help you make the right decision. The following pages feature a curated selection of door handle models from three different collections. I believe that with such a wide range of forms, materials and functional solutions, you will find your dream product.

A handwritten signature in black ink, appearing to be 'Ker', is centered within a light gray rectangular box.

ENGER – manufacturer and general distributor of APRILE, STILE, STERK and ENGER door handles and accessories.

The last 30 years have seen ENGER under go a huge evolution – from a Polish family business to a design brand present on twenty-five markets, from a distributor of door handles sourced from other manufacturers to a company manufacturing its own collections and designs created by award-winning designers.

The transformation has always been driven by the ambition and courage of Robert Kwiecień, the ability to listen to the market's needs and great perseverance in searching for the best solutions.

The company motto “The power of details” embodies everything we do.

**The quality of our products can be measured by the class of every detail and the complete understanding of our customer's expectations. We believe that details separate something good and perfection.**

### AWARENESS

Working together with renowned architects, designers and opinion-forming media we build awareness of how important first-rate design is in everyday life.

### COMFORT

Thanks to our awareness of changing functional and aesthetic needs we can not only offer great products, but also the comfort that our customers can enjoy throughout the entire process.

### COMPLEMENTING NEEDS

A wide range of forms, finishes and functional solutions gives you the opportunity to choose a specific product and achieve the desired effect.

### COHESION

Our goal is to make ENGER door handles into a natural extension of the aesthetic choices of our customers and, at the same time, an integral part of the look of their homes.

### CONFIDENCE

We guarantee each door handle we sell offers the highest level of workmanship and comfort.

- 30 years of experience
- 4 own brands
- 8 renowned designers
- 170 models of door handles and door knobs
- 49 types of finishes
- 37 door handles designed by Polish designers
- 6 production plants
- 15 awards and distinctions

We work with prominent Polish designers, such as Maja Ganszyniec, Maria Jeglińska-Adamczewska, Kabo&Pydo, Jan Kocharński, Krystian Kowalski, Joanna Leciejewska, Bartek Lewandowski and Tomek Rygalik.

We don't limit ourselves to one style. Our design partners are chosen based on shared values: a passion for design, the ability to combine form and function, high standards of craftsmanship and attention to even the most minute details.

Together, we observe how needs change, both in terms of function and aesthetics, and offer innovative solutions and premium products.

## MAJA GANSZYNIEC

Maja takes a comprehensive approach to the creation process. She always strives to find a sustainable solution, often relying on traditional craftsmanship to highlight the beauty of her favourite natural materials. In her work with many renowned companies she creates truly unique designs. This flair for design was appreciated by, among others, the Institute of Industrial Design, which awarded her the title of Designer of the Year in 2017.

## MARIA JEGLIŃSKA-ADAMCZEWSKA

Maria Jeglińska-Adamczewska was born in Fontainebleau in 1983. In 2012, she founded her own Office for Design & Research. She completed Masters degree in industrial design at ECAL in 2007 and received a scholarship from the IKEA Foundation. She works on a wide range of projects, including industrial design, exhibition projects, and research-based design projects. She believes that research can provoke and generate new forms of responses and proposals in today's world. Her clients include Ligne Roset, Kvadrat, Plato, Trame, Vitra, Hermès, Puro hotels, Saint-Étienne Design Biennale, and the Museum of Modern Art in Warsaw.

## KABO&PYDO

Kabo & Pydo is a Warsaw-based design and strategy studio founded in 2012 by a designer couple, Kasia Kabo and Tomek Pydo—graduates of the Academy of Fine Arts in Warsaw and Politecnico di Milano. Their projects have received numerous international awards, including the exceptionally rare Red Dot: Best of the Best. The Institute of Industrial Design named them Designer of the Year 2020, and in 2025 they were awarded the title of Designers of the 25th Anniversary of Elle Decoration in a readers' poll. Their projects and successes are the result of teamwork, in-depth research, careful observation of human behavior, and many years of experience in designing products, strategies, and brands across a wide range of industries. The studio's goal is to transform beautiful visions into meaningful products, tailored to market realities, distinguished by strong aesthetics and exceptional ergonomics. In everything they do, they are guided by respect and harmony.

## JAN KOCHAŃSKI

Jan got his interest in design from home, where creating was his favourite childhood pastime. He turned his love for interior design and furnishings into an academic and professional career. Currently, he works on projects for some of the world's leading companies, and has received numerous awards for these efforts, such as the Wallpaper Design Award, Must Have Łódź Design, and Mazda Design.

## KRYSTIAN KOWALSKI

Krystian was born into a family of artists. He specializes in designing furniture, whole spaces and building brand images. His goal is to align the product with the needs by observing trends and behaviours, as well as employing advanced technologies and comprehensive prototyping in his work. This allows him to create bold, well thought-out projects for leading companies in the furniture industry. Numerous prestigious awards won in Poland and abroad, including the iF Design Award 2017, FX International Design Award, and the German Design Award, serve as confirmation of the unique nature of his work.

## JOANNA LECIEJEWSKA

A graduate and lecturer at the University of Arts in Poznań and SWPS University, she is an industrial designer and runs the Joa-Projekt studio. Her designs, awarded in Polish and international competitions, are based on observing user needs and the context of the final product's use. She creates products that engage multiple senses, build a unique atmosphere, and foster a close relationship with the user. She collaborates with industries such as furniture, audio equipment, optical devices, home appliances, lighting, and medical equipment. She also serves as a juror for the iF Student Design Award and the Design Europa Awards.

## BARTEK LEWANDOWSKI

Designer, born in Gdańsk, where he studied at the Academy of Fine Arts at the Faculty of Design. He graduated in 2007 (MA). Since 2008 he has worked in the field of architecture and product. Bartek has been involved in team projects for leading manufacturers, brands and cultural agencies in Poland. The works were presented at exhibitions and received awards at the furniture fairs, including the Good Design award in 2011 granted by the Institute of Industrial Design. At the end of 2013 he moved to London where he continued his professional career in well-known design studios. He worked total of six years there developing solutions for leading international companies. Between 2021-22, he lectured at the Academy of Fine Arts in Gdansk within the course of Social Design and Teamwork International Design Practice. In 2021, he founded Design for Industry - Bartek Lewandowski to cooperate with manufacturers, companies, institutions in order to create unique solutions, services and products for everyday use. In his works he looks for new solutions and functionality, as well as the beauty and elegance of objects.

## TOMEK RYGALIK

Tomek lives and breathes design on several levels: as a designer, curator, creative director, mentor and educator of the next generation of designers, with extensive experience and a Ph.D., professor at Aalto University. It is his belief that design can change the world through graceful and useful forms. His unconventional approach attracts the largest companies in the world, and also allows him to cultivate strong ties with the artistic world. He is recognised with several prestigious international awards.

## REBIRTH OF BEAUTY

APRILE, a collection launched in 2017, embodies timeless beauty based on harmony and classical proportions. APRILE handles are made for customers looking for original, but balanced forms, far from pretentious design and fleeting trends. Premium materials, advanced technological processes and the experience of respected global manufacturers all come together to guarantee perfect workmanship and comfort in use of each handle bearing the APRILE logo.

Beauty takes many forms. It can be found in the wonders of nature, unique objects, as well as fleeting moments. In creating the APRILE brand, we reached for classical proportions and divisions. We chose shapes that feel natural to the human eye, combined unique sources of inspiration, and gave the whole a truly modern form. This is how we created our standards of beauty, which the juries of design competitions, such as Good Design 2018, Good Design 2019, Must Have 2022, Good Design 2022, Good Design 2023 or Good Design 2024, have also found compelling.

Handles from the APRILE collection are made of a zinc and aluminium alloy, ZnAl and brass. The range is beautifully complemented by unique finishes: natural leather and black crystal.

[www.aprilehandles.com](http://www.aprilehandles.com)

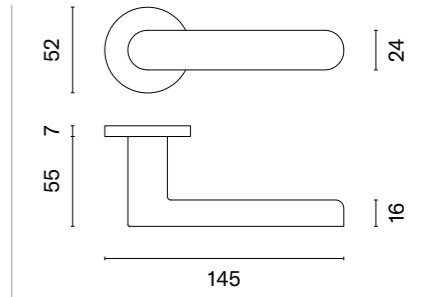

All APRILE door handles have successfully passed tests at the Institute of Precision Mechanics, obtaining the 4th operational load category, the highest possible, and the 7th durability category, again the highest, which requires completing 200,000 work cycles. The above parameters are confirmed by a National Declaration of Functional Properties.

# STILE

## STYLISH DESIGN

This collection, launched in 2018, puts the user's needs first. Handles from this family are 100% made of aluminium. They exhibit extraordinary manufacturing precision, durability, as well as forms that are functional and carefully thought-out. The STILE collection is addressed to customers looking for an attractive and original design of the highest level.

[www.stilehandles.com](http://www.stilehandles.com)

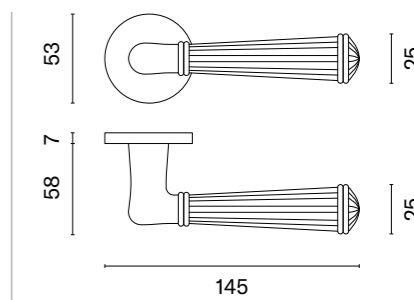

All STILE handles have successfully passed tests at the Institute of Precision Mechanics, obtaining the 4th operational load category, the highest possible, and the 7th durability category, again the highest, which requires completing 200,000 work cycles. The above parameters are confirmed by a National Declaration of Functional Properties.

## A CHOICE FOR YEARS

The collection, produced since 2018, epitomises a high production standard, excellent material quality, and guarantees a favourable price. Thanks to a simple and universal design, it naturally complements any space, its function and its style, which is why it is frequently chosen by investors.

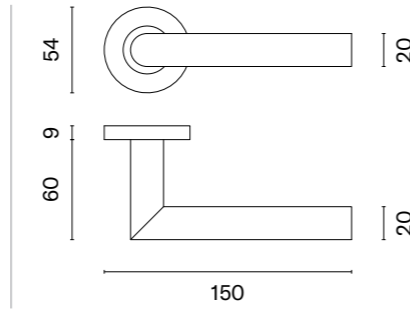

The STERK collection comprises stainless steel door handles, sliding door handles and matching door stops.

[www.sterkhandles.com](http://www.sterkhandles.com)

All STERK handles have successfully passed tests at the Institute of Precision Mechanics, obtaining the 4th operational load category, the highest possible, and the 7th durability category, again the highest, which requires completing 200,000 work cycles. The above parameters are confirmed by a National Declaration of Functional Properties.
